Island Life

At Murjan Al Saadiyat, we have designed our community with nature in mind. Our villas and townhouses are strategically positioned to maximize sun exposure on the roof terraces while also providing shade. We've also taken great care to minimize the adverse effects of shadows on external spaces, ensuring our residents can enjoy stunning views and comfortable living spaces.

In addition, we have captured the refreshing breeze by arranging our community components and public spaces to take advantage of the direction of the prevailing winds. This creates a relaxing and enjoyable environment for our residents, no matter where they are in the community. At Murjan Al Saadiyat, we believe in designing homes that work harmoniously with the natural environment, providing our residents with a serene living experience.
